Profile

I am a highly motivated final year Creative Computing Global student, with the experience in multiple programming languages and technologies. With skills in event planning, team leadership, and critical thinking gained through work experience and volunteer opportunities on top of the time spent in university. I was also given the chance to study aboard at the Copenhagen School of Design and Technology (KEA) which improved my ability to adapt to new situations and allowed me to learn about other cultures.

Education

BSci (Hons) in Creative Computing Global
Edinburgh Napier University

Modules undertaken during third year:

- Digital Storytelling
 - How to create stories and characters for digital stories, persona creation for testing
- Advanced Web Technologies
 - Python/Flask web Development using Jinja 2 and bootstrap in a Linux environment
- Scripting for Interactive Media
 - UX and Design based web design and development module

Modules undertaken during Semester aboard at KEA:

- Marketing and Communication
 - Analyse, develop and implement marketing concepts with a focus on Omnichannel marketing
- E-Commerce
 - Digital Commerce involving strategic considerations, optimisation and management of solutions
- Project Management
 - 24 hour group project to simulate a "Work Crunch". Developed a small viral marketing campaign

Modules undertaken in fourth Year:

- Creative Computing
 - Creative use of all computer skills, Creating interactive artwork for a collaborative museum exhibit
- User Experience
 - History and progression of User Experience overall, how to put the concepts into practice and how to study their effects of different user experience solutions.
- Professional Identity through Portfolio Development
 - Module focused on assisting the transition from student to professional
- Honours Project
 - Research into "TwitchPlaysPokemon" internet phenomenon and testing to see the effects of group based decision making in Video Games.
